

Hand Soap

Hand Soap

In accordance with the USGBC LEED-EB program, hand soap must not be anti-microbial. A pH between 6 and 8.5 is desirable. Foaming soap has several added benefits to the customer and the environment. When comparing an 800mL cartridge of foam soap to an 800mL of regular hand soap, the foam soap allows for almost triple the number of washes, cutting costs and waste generated by empty cartridges. Foam soap also requires less water for rinsing, thereby reducing the demand on the potable water supply and water expenses. Because of the decrease in water requirements and reduced human and aquatic toxicity, the soaps from GoJo are certified by Green Seal and EcoLogo.
