Laundry Products

Laundry can be a crucial part of facility operations. Green Cleaning principals and concepts do apply. US Chemical's NEXUS System is safe to use, easy to handle and will reduce waste. NEXUS System eliminates spills that can occur when changing product cartridges. Product can only be dispensed when the cartridge is in the dispenser. This creates a closed loop system that protects the health of the employee by reducing direct exposure to the product. 3100mL cartridges replace bulky 5 gallon pails making cartridge changes quick, easy

and painless. The risk of physical injury to an employee from lifting is dramatically reduced. NEXUS System cartridges can reduce plastic waste by 60%. Cartridges are recyclable, further reducing the strain on the waste stream and waste disposal costs. As an added benefit, your facility can reclaim storage space by using the smaller 3100mL high-concentrate cartridges versus larger 5 gallon buckets of solid product. Performance is where NEXUS System washes away the competition. All NEXUS products boast a high-concentrate formula

which when dispensed through the use of precise peristaltic pumping results in accurate delivery of product and consistent results that you and your patrons depend on. Solid product can be affected by variables such as water feed temperatures, water feed pressures and capsule levels. NEXUS products are not affected by these variables and will deliver the correct amount of product to achieve maximum results. US Chemical's NEXUS System enhances your laundry operation by reducing plastic waste, reducing water consumption, protecting your employees, and ensuring complete use of the product while improving convenience and providing outstanding performance.

DSC Item Number	Description	MFG Number	Pack/Size
US CHEMICAL			
448206019	Nexus Built Laundry Detergent	077178	2/3100mL
448206095	Nexus Suds Laundry Detergent	077122	2/3100mL
