

Entryway Matting

Entryway matting both outside and inside facility entrances and high traffic areas greatly prevents and reduces the amount of dirt and other contaminants from entering the building. Stop the spread of dirt and other contaminants at entry points and prevent their negative effects on the rest of the facility. Matting should be of high quality, in good working order and cover the first 12 to 15 feet of building entryways. DSC offers top of the line Crown and Andersen matting in several different sizes and styles to meet your facilities needs.
