

Microfiber

Microfiber

Experience the benefits of microfiber cleaning. Microfiber is a versatile product that can be used from dusting and everyday cleaning to stripping and floor finishing. Microfiber technology simply does a better job than a regular cloth or paper towel, which actually produce lint and debris. Microfiber traps more dirt, dust, and bacteria than conventional cleaning products and can get the job done over 45% faster. Due to its durable construction, it will hold up over hundreds of commercial launderings. Innovative microfiber technology allows the customer to

save money by using less product and water while increasing productivity. Microfiber uses up to 95% less chemicals and water for substantial cost savings and greener cleaning. Reduce the risk of slip/fall injuries by minimizing surface moisture. Wet Pads feature color coding for quick identification by area or room helping to prevent the chance for cross-contamination. A variety of accessories such as mop handles and telescopic poles allow for a number of different cleaning applications with microfiber products.
