Roll Towels

In accordance with the USGBC LEED-EB program roll towels must meet GS-09 or EPA minimum standards (40% post-consumer material) in order to be considered GREEN. The GS standard requires that towels must be made of 100% recovered material, including at least 40% post-consumer material. Hard wound high capacity rolls are recommended. When these towels are combined with controlled use dispensers the result is a reduction in product entering the waste stream and more efficient use of the product, which equals savings for the end user. For detailed product standard information visit <http://greenseal.org>, www.usgbc.org/leed, <http://www.epa.gov>. Roll towel systems from Bay West, SCA, Kimberly-Clark and Georgia Pacific will help reduce waste by using high capacity rolls combined with dispensing control and recycled or post-consumer paper products. DSC stocks items including: Green Seal and Environmental Choice Certified or EPA preferred items such as roll towels, bathroom tissue, folded towels, kitchen towels and dispensers.

Folded Towels

Although the USGBC LEED-EB program strongly discourages the use of hand towels due to a lack of controlled dispensing systems and greater potential for waste, DSC recognizes the needs of our customers and has decided to include Green Seal and Environmental Choice Certified as well as EPA compliant hand towels. In order to be EPA approved hand towels must contain 40% post-consumer materials.

Toilet Tissue

In accordance with the USGBC LEED-EB program toilet tissue must meet GS-01 or EPA minimum standards (20% post-consumer material) in order to be considered GREEN. The GS standard requires that tissue must contain 100% recovered material, including 20% post-consumer materials. Additionally, each roll of bathroom tissue must contain at least 40 square feet of product (approx. 300x4.5x4.4 inch sheets). When tissue is combined with controlled use dispensers, the result is a reduction in product entering the waste-stream and more efficient use of the product, which equals savings. For detailed product standard information visit: <http://greenseal.org>, www.usgbc.org/leed, <http://www.epa.gov>. DSC is offering quality tissue combined with several dispensing control systems from industry leading vendors including Bay West, Georgia Pacific, Kimberly-Clark, and SCA. A wide variety of sizes and packaging are available to meet your facilities needs.

Facial Tissue

In accordance with the USGBC LEED-EB program, Facial Tissue must meet GS-01 or EPA minimum standards (10% post-consumer material) in order to be considered GREEN. The GS standard requires that facial tissue must contain 100% recovered material including 10% post-consumer materials.
