

Plates and Bowls

Greenwave products are made from renewable resources including sugarcane, grass, and reed plasma. These products are biodegradable within two weeks, waterproof and oil proof, non-toxic, and recyclable.

Huhtamaki's Chinet brand molded fiber tableware products use 100% pre-consumer recycled milk carton stock, have 100% recovered fiber content and are biodegradable in composting.

Huhtamaki's Rough Molded Fiber products use 100% pre- or post-consumer recycled newsprint, have 100% recovered fiber content and are processed chlorine free. Huhtamaki's method of production for recycled molded fiber products saves over 2.5 million trees, 1 billion gallons of water, 65 million gallons of oil, and 600 million kilowatt hours of energy annually.

Huhtamaki's PaperPro Naturals is mid-weight and made of 100% reclaimed fiber with poly coatings. PaperPro Naturals is biodegradable and compostable.

Genpak's Harvest products are made from resin containing PLA and annually renewable resources including corn, rice and wheat. These items are fully biodegradable when put into a commercially run composting facility.
