

Warewashing Products

Warewashing Products

U.S. Chemical delivers quality and innovation through its new line of Warewashing Products and dispensing equipment. Competitive performance combined with concern for the environment provides the end user with a unique product and savings opportunity. User friendly 3100mL and 1500mL recyclable containers replace the standard bulky 5 gallon containers. Less waste, and less storage space requirements are added benefits. The Ultra Active product line is highly concentrated, providing more active ingredients in two

cartridges than in an entire 5 gallon bucket. The environmental benefits are three fold: smaller packaging combined with a high concentration formula reduces the number of shipments of product need along with shipping costs, the dispensing system and concentrated formula reduces water usage, the smaller recyclable packaging reduces plastic waste by 60%. Save money on waste removal, while reducing the environmental effects of both shipping and disposal.

DSC Item Number	Description	MFG Number	Pack/Size	UM	Standard or other information
U.S. Chemical					
446501319	Minimax Dish Detergent	4486191	2/3100 ml	CS	recyclable pkg; reduced water consumption*
